More info about nutritional options
All of these menu options are prepared with MTC oil, which is a concentrate of medium chain triglycerides, that are easily absorbable and help promote fat burning while providing you with more energy.

HCG: A temporary diet limited to 1000 calories a day for 4 weeks while taking HCG, which promotes the mobilization and elimination of abnormal, excessive fat deposits.

Live Well Clinic Anti-Inflammatory recommendations (cleanse diet approved)
The anti-inflammatory, hypoallergenic meals are tailored for addressing food sensitivities, weight resolving various food addictions, etc. These options are suitable for 21-day cleanse meals.

Low Carb / Ketogenic
The Ketogenic approach involves a high-fat adequate-protein, low carbohydrate diet that forces the body to burn fats rather than carbohydrates. For those looking to feel satiated longer with fewer cravings.
